

Alzheimer's Biomarker Hypothesis Agent

An agentic research workflow — genetic risk × imaging-biomarker progression · built on Google ADK + Gemini

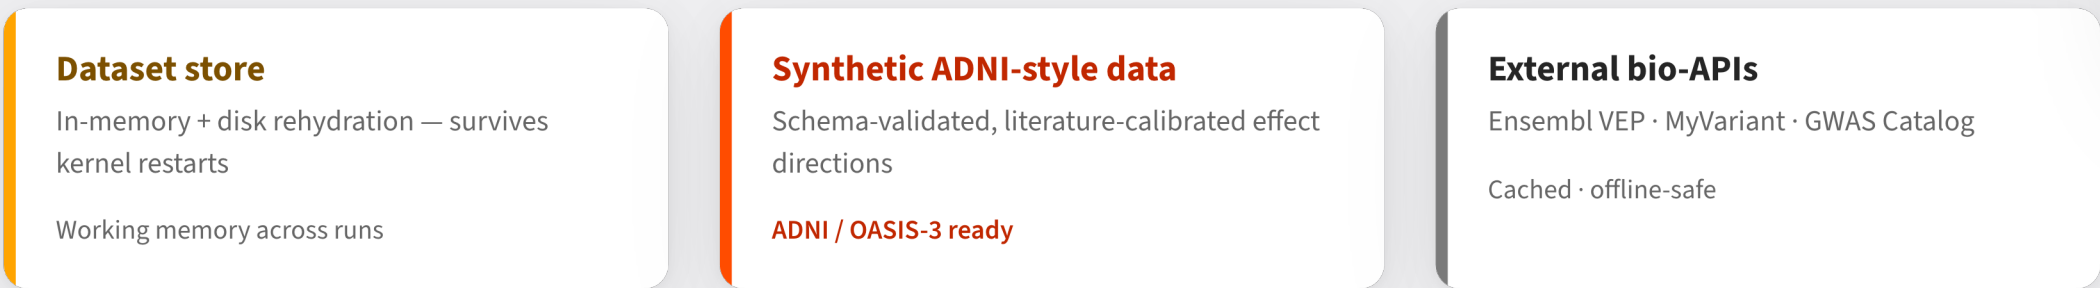

1 Agent orchestration

2 Agent tools

3 Data & memory

Quality & Security

Independent evaluation & defense-in-depth

Eval harness · 17 / 17

Routing	6 / 6
Safety	6 / 6
Grounding	3 / 3
Ranking	2 / 2

100% pass rate

Grounding checks

- Citations $\subseteq$ curated set
- Reported stats = recomputed
- Effect direction not inverted
- Mandatory cautions present

Guardrail (defense-in-depth)

- System-instruction refusal
- Independent screen tool

Research tool — NOT for diagnosis or clinical use
